Need QuickBooks® Automation?

The FM Books Connector plug-in provides FileMaker® Pro access to every record stored in a QuickBooks company file. Using this plug-in you can freely exchange data between these two powerful applications and it is as simple as using a handful of script steps that do not require any knowledge of XML!

Key Features:

-  Communicates with all available QuickBooks tables, records and fields.
-  Allows you to populate QuickBooks with FileMaker data and vice versa.
-  Does not require knowledge of XML or other "non-FileMaker" technologies to implement.
-  Includes a demo file which shows you how to program the most common type of integrations.

The screenshot displays the 'Customer Center: Golliday Sporting Goods (Invoices)' window. On the left, a list of customers is shown with columns for Name and Balance Total. The 'Golliday Sporting Goods' customer is selected, showing a balance of 2,689.75. On the right, the 'Customer Information' tab is active, displaying details for Michael Golliday, including contact information and a list of invoices. A table of invoices is shown at the bottom, with columns for Invoice #, Date, Due Date, Ship Date, Total, Balance Due, and a 'View in QB' link. The total balance due is \$2,689.75.

This is your data in FileMaker.

Any Questions?

Why FMBooks Connector?

Save time and energy through the elimination of double entry of contacts, invoices or sales transactions. Provide financial data to your staff without having multiple people accessing your QuickBooks file. With the use of a handful of script steps that do **NOT** require any knowledge of XML you can exchange data with your QuickBooks files. The FMBooks Connector allows you to access multiple company files vs. only one company file.

The following list represents all the areas of QuickBooks you have access to with the plug-in:

Accounts

- Aging Report
